Having creativity and imagination.

## Experience

### Front End Engineer

HooksTech

Sep 2022 - Present (8 months)

Working at the outsourcing company had the opportunity to work on several projects with different types of business.

As my first project in my React developer career got to work on the remote clinic platform that connects both doctor and patient through a video call.

- Got working experience with Media Devices and WEBRTC protocol
- Utilised peer to peer video call through JitsiMeet
- Grew my knowledge in using React Context
- Implemented new feature for the video call such as automatic Picture in Picture mode on scrolling.
- Experience in migration process from legacy app to a new Technical stack

Also the next project that I had experience working on, was developing a CMS for grocery stores.

- Implemented new functionality in web products;
- Maintained an existing codebase;
- Participated in code review sessions;
- Contributed to the application architecture design
- Experience with SonarQube CI and refactored a lot of existing legacy issues.
- Utilised TypeScript in the whole project
- I've been interacting partially with Redux Saga and Redux
- I've been changing some existing tests with React Testing Library

### Front End Engineer

Upwork

Jan 2022 - Sep 2022 (9 months)

While I was working as a freelancer I got to work on developing a real-estate dashboard platform that offered real-estate agents possibility to give their property for rent.

- Got experience creating MongoDB database and connecting it to the back-end using Express JS (NodeJS)
- Developed a new dashboard user interface for the platform using React and Typescript
- To provide a good UX in a short term, I've been using a lot Refine, a React-based framework that enables rapid development of web applications.
- The full stack of technologies for these project was: React, Typescript, Framer Motion, Styled Component, MongoDB, Node + Express
- Had the opportunity to clean legacy code
- Adjusted a lot of projects on responsive design.

## Software Engineer

Crossover International Moldova

Feb 2019 - Dec 2021 (2 years 11 months)

Crossover International is a global non-profit organization that has been working tirelessly to support missionaries across the world. With an office in Moldova, the organization has been providing various kinds of assistance to those who are working to make a positive difference in the world. To support their mission, we have developed a website that served as a platform to present their goals and aspirations to the public and also served as a booking platform for their property, a small Hotel.

- Participated in the whole technical design process of the project
- First experience developing web layouts using pixel perfect approach.
- Developed expertise in using Wordpress, including theme development, plugin customization, and integration of payment gateways for booking and donations integrating 2Checkout Monetization Platform.
- Highly improved the HTML & CSS skills
- Improved communication skills by regularly coordinating with the client and team members to ensure the project meets the requirements and expectations.
- Worked with MySQL database management to store and retrieve information such as booking details, user profiles, and donation records.
